

Aleksander Kamiński „Kamienie na szaniec”.

The book that I really like to read is 'Kamienie na szaniec' by Aleksander Kamiński. The work is a documentary, it is also based on the diary of one of the protagonists- Zośka. The action takes place in German- occupied Poland and the book itself was published during the war.

In addition to the historical theme, the novel also shows the heroic attitudes of young soldiers of the „Grey Ranks”, for whom friendship, fidelity and homeland were of great importance. The boys were still in danger, but despite this, they were able to maintain their dignity during this difficult period. The work therefore has a deep and universal message, emphasizing the importance of these values, which nowadays people do not pay attention to.

This is my favorite book because the topics of wars are interesting for me. The novel is interestingly written, and is based on facts, which makes reading even more attractive.

Today, there are fewer and fewer people like Alek, Rudy and Zoska, but thank to such people we can live in an independent country. I think the book is worth reading because it allows us to learn how to be a true patriot and what sacrifice it sometimes requires. It is worth knowing 'how live beautifully and die beautifully...'
